

# ATLAS® FOREST

## Performance

- Extra light and flexible hose even at low temperatures (-15°C).
- Easy to handle and roll up.
- Highly resistant to the flow of chemicals thanks to the interior lining's special composition.
- Resistant to pressure thanks to its circular weave construction.
- Available with various international certifications.

## Uses

- Ideal for forestry use.

## Construction

### Interior lining:

Special white polyurethane lining. Minimal flow loss thanks to its smooth walls.

### Exterior fabric:

Circular weaved outer layer made from high tenacity polyester thread. Lighter flat fabric. No defects (broken threads, knots, etc.)

## Technical characteristics
